

# Project Report

## Project Scope

- NFT Smart Contracts Creation, Deployment and Verification (ETH)
- Minting Engine
- Marketplace integration (Opensea) **OpenSea**
- Wallet Integration **Metamask**
- Arweave or Pinata storage
- Presale Whitelist
- Airdrop for giveaways users wallets
- Presale and Public Minting-different dates,price and time.
- Random NFT Minting and Reveals, max mints per transactions. I would like part of the collection to be used for promotional use .it can be minted before a private sale and then dropped to people wallet
- Royalty **5%**
- It can be provided a countdown counter and the virtual gallery video on the website

Similar websites : <https://www.billionairesheepclub.com/> ( take the idea about spinning animations)

Important : Project cats nft will act as the membership to the DAO and the squad!

**\*Please update if there any requirements\***

- Can we add an area for the DAO information. Need DAO Set up
- We want to link our link tree, instagram, twitter, and discord.
- We would like to add at the bottom of the site as seen on NFT Calendar and NFT Evening. I will get you the logos to add if you need.
- Add a Utilities Tab (can put breeding, mutation, serum, and airdrop info there)
- I want to mention how we are donating to charity, The Alley Cat Allies. Should we add a Charity Tab? Or just mention on the site?
- We want Breeding and Mutations ( add later on if possible)
- NFT (Serum) Airdrops for those who hold our NFT for more than 30 days. These holders will get our Mouse NFT that acts as a serum which can be “fed” to the Cat, which makes a Zombie Project Cat!
- We want the Reveal to be 3 days after selling out.
- I want to mint 100 immediately to the Project Cats wallets for future giveaways and promotions.
- 100 will be used for the winners of our past & current giveaways before mint.
- Max Mint per wallet is 2
- Whitelist will be between 500-1000 (aiming for 1000)
- Whitelist Mint will be .07
- Public Mint will be .09
- Ultra Rare will be Ranked 1-10 and then rest will be ranked after.

I want to eventually introduce staking for the NFT, can that be added later? Give rewards in our own coin.
